

# Second-order full grid, step-30 LoRA, exact means (500 docs/side, no clipping)

task-side: score of  $g_n$  on pair  $(f_m \rightarrow t_n)$   
binding conjunction would light the diagonal

data-side: score of  $g_m$  on pair  $(f_m \rightarrow t_n)$   
 $g \leftrightarrow f$  data coupling lights whole rows
